

Row Row Row Your Boat

Rotating Pen Holder

INSTRUCTIONS

Cut out the two templates. Laminate the larger template. When you are cutting out the girl in the boat stay fairly close to her outline rather than cutting out the water that she is on as she will then be put into a laminated sheet. Then that laminated sheet needs to be cut out so that it is the same shape size (just a fraction longer) as the other template.

Once this has been done you need to sellotape the ends of each shape together so that you end up with two cones.

Then slip the blue cone inside of the clear cone which you can twist so the boat can go around. The pen holder can be used like this as a support but it is far better if you have a small plastic throwaway cup for a base of the holder which you can sellotape to the inside of the blue cone then you can pick up and move the cone.
