

Five Little Speckled Frogs

Instructions

Help the little frogs cool off in the pond..

Start off by putting all of the frogs on the log in order. Each player takes turns throwing the dice. Whatever number comes up on the dice the player then has to put the frog with that number in or out of the pond. You may also move two frogs that equal another frog into the pond if you wish (eg. If the dice says three you can put in frogs 1 and 2 if they are both on the log). If the picture of the log comes up then that counts as a missed turn.

The winner is the player who gets all the frogs into the pond at the same time.
